SUMMARY

I work on mobile game development, automation and AI agents. I have games live on Google Play, a news digest that runs itself every day, and bilingual knowledge sites. I hold UAV-1 and commercial UAV pilot certificates.

PROJECTS

BEM Logic — mobile game studio (co-founder)

- We jointly run Google Play publishing, the store account and the server infrastructure; two of our games are live (Geometra, Lucky Wharf).

Geometra – Neon Survivor (live on Google Play)

- A mobile survival game I built end to end: store listing in 10 languages, in-app purchases with Play Billing.
- Improved performance and UI based on real-device testing; currently porting it to Unity 6.

Ahbar — automated science & technology digest

- Scans 86 academic and technical sources daily, removes duplicates with SimHash and writes Turkish and English summaries; publishes itself with Rust and GitHub Actions.

Useful Sites — annotated link directory

- A live directory of more than two thousand links, sorted into categories, each with a Turkish and English note.

Athena — a map of human knowledge

- A bilingual site (Astro) showing human knowledge from stone tools to today as a world tree, presenting claims with their sources.

Masa — AI agent desk

- A local workspace that brings the AI agents I work with, their sessions and a task board onto one screen.

EXPERIENCE

IT Intern

June – August 2026

- Worked with the IT team on network infrastructure (switches) and user support requests.

EDUCATION

Computer Programming (Associate degree)

2025 – present

CERTIFICATES

- **UAV-1 Pilot Certificate** — Turkish Directorate General of Civil Aviation (SHGM)
- **Commercial UAV Pilot** — Turkish Directorate General of Civil Aviation (SHGM)
- **Datathon 2026 Certificate of Participation** — BTK Academy · Google · Entrepreneurship Foundation
- **Entrepreneurship Training (Traditional & Advanced)** — KOSGEB

SKILLS

Programming	Python, Rust, C#, GDScript, SQL, PHP, JavaScript / TypeScript, HTML / CSS
Games & mobile	Unity 6, Godot, Google Play Console, Play Billing
AI	Claude Code, AI agents, MCP, YOLO
Systems & tools	Git / GitHub, GitHub Actions, Linux, Cloudflare, Astro
Languages	Turkish (native), English (B1), Arabic (beginner)
